# Nguyen Nhut An

**AI Engineer**

LinkedIn  GitHub  annnse183006@fpt.edu.vn  0944836206

## EDUCATION

**FPT University** — **Ho Chi Minh, Vietnam**
Artificial Intelligence - Bachelor's Degree — **September 2022 - December 2026**
GPA: 8.4/10

- **Awards:** Honorable Student of Semester – Spring 2024, Summer 2024, Fall 2024, Spring 2025
- **Relevant Coursework:** Python Programming, Mathematical Foundations for AI, Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Neural Networks, AI Applications

## SKILLS SUMMARY

- **Languages:** Python, SQL, JAVA
- **Frameworks:** PyTorch, Pandas, OpenCV, NumPy, Scikit-Learn, Matplotlib, Seaborn, FastAPI, Streamlit
- **Tools/Platforms:** Jupyter Notebook, Visual Studio Code, Wandb Git, Docker, HuggingFace
- **Databases:** MySQL, MongoDB
- **Soft Skills:** Reporting, Presentation, Teamwork
- **English:** B2 Level – Able to communicate and read technical documents effectively

## PROJECTS

**End-to-End Question Answering System** [GitHub] — **Mar – Apr 2025**
- Built a question answering system using DistilBERT for answer extraction and FAISS for document retrieval.
- Fine-tuned on SQuAD2.0 to handle both answerable and unanswerable questions.
- Achieved efficient response time with vector-based retrieval architecture.

**Aspect-Based Sentiment Analysis** [GitHub] — **Jan – Feb 2025**
- Developed ABSA system using DistilBERT for aspect term extraction and sentiment classification.
- Fine-tuned NER model for aspect extraction and sequence classifier for sentiment polarity.
- Combined extracted aspect terms with context to predict sentiment (Positive/Neutral/Negative).

**Scene Text Recognition** [GitHub] — **Nov – Dec 2024**
- Extracting and recognizing text from natural scene images with varying fonts, orientations, and backgrounds.
- Designed a two-stage pipeline combining YOLOv11 (detection) and CRNN (recognition).
- Processed and converted ICDAR2003 dataset for training and evaluation.
- Achieved high accuracy on scene text extraction tasks.

**Neural Style Transfer** [GitHub] — **Apr – May 2024**
- Artistic image transformation by combining content structure with artistic style patterns.
- Developed a style transfer system using VGG-19 to blend content and style images.
- Optimized loss functions (content, style, total variation) for quality output.

## CERTIFICATES

**Machine Learning (AI VIET NAM) CERTIFICATE** — **June 2025**
- ML fundamentals including mathematics and Python programming.

**Deep Learning (AI VIET NAM) CERTIFICATE** — **June 2025**
- CNN, RNN, LSTM, and Transformer architectures.

**Computer Vision and NLP (AI VIET NAM) CERTIFICATE** — **June 2025**
- Skills in Computer Vision (UNet, Object Detection) and NLP (Classification, Sentiment Analysis).

**GenAI and LLMs (AI VIET NAM) CERTIFICATE** — **June 2025**
- Generative AI (VAE, DCGAN, Diffusion) and LLMs (GPT, BERT, RAG).
