

User Authentication – The Lite version

1. npm i express-session
2. update app.js

```
const session = require('express-session')
...
app.use(session({
  secret: 'secret',
  resave: false,
  saveUninitialized: true
}));
app.use('/', route...)
```

3. POST method

```
const signIn = async (req, res) => {
  const { username, password } = req.body;
  try {
    const user = await Account.findOne({ username });

    if (!user) {
      req.session.message = 'Invalid username or password';
      return res.redirect('/users/login');
    }
    const match = await bcrypt.compare(password, user.password);

    if (match) {
      req.session.username = username;
      req.session.message = null;
      return res.redirect('/users/dashboard');
    } else {
      req.session.message = 'Invalid username or password';
      return res.redirect('/users/login');
    }
  } catch (error) {
    console.error('Login Error:', error);
    req.session.message = 'An error occurred during login. Please try again.';
    return res.redirect('/users/login');
  }
}
```

4. Update LOGIN page

```
<% if (message) { %>
  <div class="notification is-warning is-light">
    <p><%= message %></p>
  </div>
```

<% } %>

5. Dashboard page

```
<h1>Hello: <%= username %></h1>
<a href="logout">Logout</a>
```

6. LOGOUT method

```
const logout = async (req, res) => {
  req.session.destroy((err) => {
    if (err) {
      return res.redirect('/users/dashboard');
    }
    res.redirect('/users/login');
  });
}
```

7. Update LOGIN method

```
const login = async (req, res) => {
  try {
    res.render('login', {
      message: req.session.message,
      username: req.session.username
    })
  } catch (error) {
  }
}
```

8. Update WELCOME method

```
const welcome = async (req, res) => {
  if (!req.session.username) {
    return res.redirect('/users/login');
  }
  res.render('dashboard', {
    username: req.session.username
  });
}
```

9. authMiddleware module

```
module.exports = (req, res, next) => {
  if (!req.session.username) {
    req.session.message = "Please log in to continue.";
    return res.redirect('/users/login');
  }
  next();
}
```

```
};
```

10. Update dashboard route

```
const auth = require('../Middleware/authMiddleware')  
accountRouter.route('/dashboard')  
  .get(auth, accountController.dashboard)
```
